Parámetros

in>velon

The screenshot displays the Insta360 Studio software interface. On the left, a large video preview window shows a 360-degree view of an office interior. A man in a dark jacket and light-colored pants is standing in the center, looking at his phone. The office has white desks, computers, and a large potted plant. The video player at the bottom shows a progress bar at 00:00:02 / 00:00:25 and various playback controls.

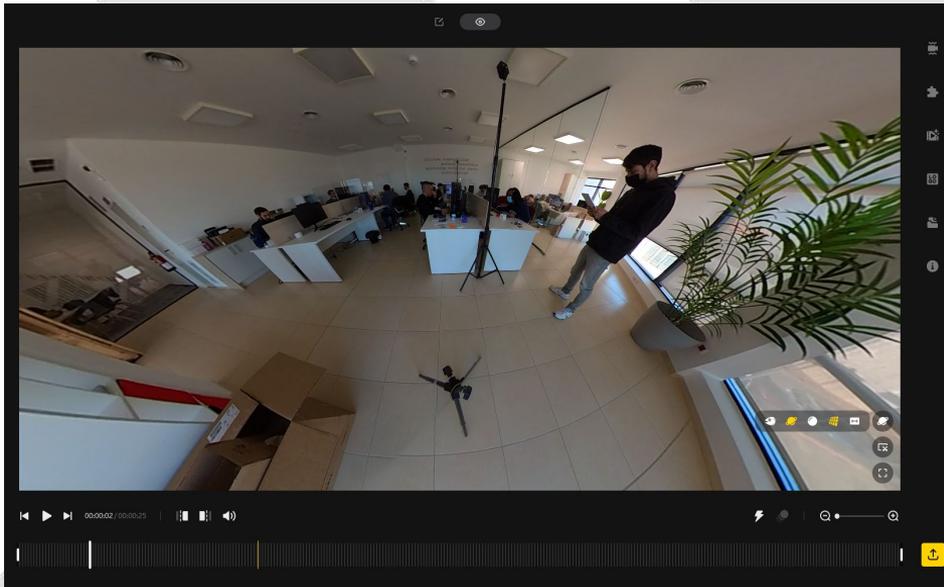

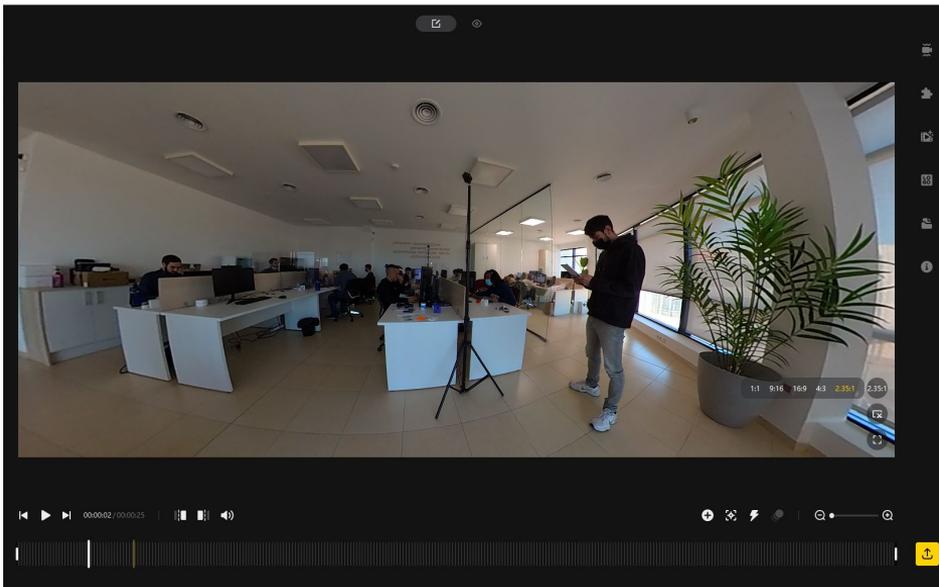

On the right side, there are three settings panels:

- Stabilization Type:** Features a toggle for "FlowState Stabilization" (turned on) and a "Direction Lock" toggle (turned off).
- Stitching:** Includes a "Stitching" dropdown menu set to "Sticky Lens Guard". Below it are options for "Premium Lens Guards": "Dive Case (Above water)", "Dive Case (Underwater)", "Cold Shoe", and "Custom". The "Stitching Optimization" section has toggles for "Dynamic Stitching" and "Chromatic Calibration". The "Stitching Calibration" section includes a yellow "Calibrate" button and a "Reset" button.
- Logo Settings:** Shows a grid of logo styles: "None", "Style 1", "Style 2", "Style 3", and "Style 4", along with an "Add Custom" option. A note at the bottom suggests using a 500x500 png format.

AuroraCloud Tours 360

¿Qué es Aurora Educational 360?

Aurora 360 es una plataforma Cloud que permite a los usuarios subir y mirar tours con una cuota inicial gratuita

Es un servicio de hosting user-friendly

Nos permite generar un repositorio privado de tours y un repositorio público para compartir con otros centros

AuroraCloud Tours 360

Interfaz de inicio

in>velon

The screenshot displays the AuroraCloud Tours 360 web interface. At the top left, the Aurora logo is followed by a navigation menu with three items: 'Onboarding', 'Cad Meetings' (with a 'Beta' badge), and 'Tours 360°' (with a 'Beta' badge). The main header is orange and contains the text 'Educational Version' and a settings icon. The central area features a large orange Aurora logo and the text 'URORA' in a bold, black, sans-serif font. Below this is an orange button with a download icon and the text 'Download Aurora', and a blue button with the text 'Contact with your agent to try Aurora'. The bottom section is divided into two columns: 'Supported PC VR headsets' and 'Recommended Hardware and OS'. The 'Supported PC VR headsets' column lists: HP Reverb G1 & G2, HTC Vive, Vive Pro & Vive Cosmos, Oculus Quest 1 & 2, Pico Neo 2 & 3 Series, and Pimax 8K X. The 'Recommended Hardware and OS' column lists: Graphics: 1080 Ti or 2070 Super (or equivalent), or better; Processor: i7 8th gen or Ryzen 5 1400, or better; Memory: 8 GB or more; 5GB HDD or SSD; Steam; and SteamVR 1.13 or newer. At the bottom of the page, the text 'Setup and installation' is visible.

AuroraCloud Tours 360

Aurora vs Web

Aurora

- Es user friendly
- La publicación a hosting no necesita de un técnico informático
- Hay documentación paso a paso de cómo subir el contenido al servidor
- Tours públicos ilimitados
- 50 accesos a Tours públicos de otros usuarios
- 4 Tours privados
- Ancho de banda global de 50GB
- Cada mes se reinicia la cuota
- **GRATIS!**
